Question 1

Correct
Mark 1.00 out of 1.00

_____ is a collection of programs and enables users to create and maintain a database

Answer

a. Database management system (DBMS)

b. None of these

c. Database

d. meta-data

Your answer is correct.

The correct answer is:
Database management system (DBMS)

Question 2

Correct
Mark 1.00 out of 1.00

_____occurs when copies of the same data become different.

Answer

a. Data duplication

b. update problems

c. Data inconsistency

d. None of these

Your answer is correct.

The correct answer is: Data inconsistency

Question 3

Correct
Mark 1.00 out of 1.00

_____means hiding unnecessary implementation details from users and showing only the information they need.

Answer

a. Data abstraction

b. attribute

c. Entity

d. None of these

Your answer is correct.

The correct answer is:

Data abstraction

Question 4

Correct
Mark 1.00 out of 1.00

_____store and analyze maps, weather data, and satellite images

Answer

a. None of these

b. Traditional database applications

c. Geographic information systems (GIS)

d. Multimedia databases

Your answer is correct.

The correct answer is:
Geographic information systems (GIS)

Question 5

Correct
Mark 1.00 out of 1.00

_____ allows multiple users and programs to access the database simultaneously

Answer

a. Sharing a database

b. Query

c. Maintain the database

d. None of these

Your answer is correct.

The correct answer is:
Sharing a database

Question 1

Correct
Mark 1.00 out of 1.00

_____ store textual or numeric information

Answer

a. none of theses

b. Geographic information system

c. multimedia database

d. Traditional database application

Your answer is correct.

The correct answer is: Traditional database application

Question 2

Correct
Mark 1.00 out of 1.00

_____ means that a change in the structure or organization of data does not require changes to the application programs that use that data.

Answer

a. Program-operation independence

b. None of these

c. Program-data independence

d. Insulation

Your answer is correct.

The correct answer is:
Program-data independence

Question 3

Correct
Mark 1.00 out of 1.00

_____ is a database definition or descriptive information

Answer

a. manipulating

b. Metadata

c. none of these

d. attribute

Your answer is correct.

The correct answer is: Metadata

Question 4

Correct
Mark 1.00 out of 1.00

_____ represents a real-world object or concept

Answer

a. Entity

b. None of these

c. Relationship

d. attribute

Your answer is correct.

The correct answer is: Entity

Question 5

Correct
Mark 1.00 out of 1.00

_____ enables each user defines and implements the files needed for a specific software application

Answer

a. metadata

b. Database approach

c. None of theses

d. Traditional file processing

Your answer is correct.

The correct answer is:
Traditional file processing

Question 1

Correct
Mark 1.00 out of 1.00

A _____ is a program or process that includes one or more database operations and is executed as a single logical unit of work.
Answer

a. None of these

b. transaction

c. metadata

d. database

Your answer is correct.

The correct answer is: transaction

Question 2

Correct
Mark 1.00 out of 1.00

_____ represents some property of interest

Answer

a. Attribute

b. information

c. Relationships

d. None of these

Your answer is correct.

The correct answer is: Attribute

Question 3

Correct
Mark 1.00 out of 1.00

_____ means that data continues to exist after the program finishes executing.

Answer

a. Transaction

b. None of these

c. Persistent

d. Entity

Your answer is correct.

The correct answer is: Persistent

Question 4

Correct
Mark 1.00 out of 1.00

_____ ensures that multiple users updating the same data do so in a controlled manner.

Answer

a. None of these

b. Concurrency control software

c. View

d. Metadata

Your answer is correct.

The correct answer is: Concurrency control software

Question 5

Correct
Mark 1.00 out of 1.00

A _____ is a type of data abstraction used to provide a conceptual representation of a database.

Answer

a. attribute

b. none of these

c. database

d. data model

Your answer is correct.

The correct answer is: data model
